

Supervision

Students will always have a nominated supervisor. The supervisor may be a general practitioner or a remote area nurse.

The Student will

- Follow the direction of their Placement Supervisor and understands that failure to do so may result in the termination of their placement.
- Remain mindful at all times that the Placement Supervisor is responsible for all clinical work undertaken by the Student.
- Not perform any clinical procedure, treatment or manage a patient without the express permission and or supervision as directed by the Placement Supervisor.
- Report any concerns has/she has in relation to supervision to the RUSC coordinator
